The business experienced a significant margin squeeze this month, with Operating Profit falling to \$56,700 against a budget of \$162,000, representing a 65.0% unfavorable variance. This decline was driven by a 19.2% unfavorable variance in Total COGS (\$239,500 vs \$201,000) and a 16.3% unfavorable variance in Total OpEx (\$333,800 vs \$287,000). Key cost drivers include Direct Hosting Cost, which is up 23.3% (\$185,000 vs \$150,000), due to dual-running charges during region migration. Marketing & Ads increased 31.8% (\$145,000 vs \$110,000) because campaign spend was pulled forward for the SMB launch. Revenue was negatively impacted by Consulting Revenue, which was \$110,000 against a budget of \$150,000, as Orchid Bay Holdings Pte Ltd deferred its phase 2 go-live. Despite the profit shortfall, the statutory Gross margin remains On target at 70.6%. However, Operating Cash Flow is Off target at \$26,600, which is below Net Income of \$56,700, indicating a cash conversion lag. Accounts Receivable increased 7.3% (\$930,000 vs \$866,700), which is a material movement impacting working capital.
